As a concerned citizen and taxpayer, I have been following the East Beltway project. Much of the information that has come out on this topic has been emotional or politically driven. I appreciate and support the logical thinking in the recommendation of the Planning Department regarding the East Beltway routes.

This recommendation reflects that the East Far route in particular is too far away from the center of Lincoln. The far route is not a good choice due to the fact that it is too far away from the core of the city. The East Far route would be the most expensive and least used alternative. The East Far route would also have the most negative impact to natural and historical resources.

I therefore support the recommendation NOT to build the East Far Beltway Route.

Thank you,
